WELCOME TO THE NEW ERA OF SHOOTING

SIMPLY SUPERIOR SOUND SUPPRESSION. TWO DECADES STRONG.

Since 1998, we've pioneered every major advancement in silencer technology. Led by a dedicated team of the world's top engineers, the most advanced R&D and manufacturing facilities anywhere and an unwavering commitment to industry firsts, we've been proud to bring you the most extensive line of firearms silencers in the industry, covering everything from 22 LR to 50BMG.

Now in 2017, we're moving boldly ahead toward the creation of even more lightweight, durable and adaptable signature reduction solutions for the modern shooter. New product innovations like the modular Ti-Rant 9M, the infinitely configurable SquareDrop Handguard and the muzzle blast-diminishing Blastout. All are backed by world-class AAC science and design, and driven by our enduring mission to create the greatest silencers available — today, and far into the future.

Over two decades, we've earned the trust of passionate shooters like you, and solidified our worldwide role as **THE SILENT AUTHORITY.**

AAC PEDIGREE

Advanced Armament Corporation develops and manufactures ultra-durable, technologically superior silencers and accessories for civilian, military and law enforcement use. Our 51-tooth ratchet-mount fast-attach system has long been the industry standard for fast, effective and intuitive silencer mounting, while our 3-prong flash hiders are renowned for their muzzle flash reduction. The 5.56mm, M4-2000 and 416-SD Silencers represent the gold standard for hard-use battle cans, and have been proven time and again by our military service men and women all across the globe. Our precision rifle silencers, including the Mk13-SD and TiTAN-QD, have been utilized by military designated marksmen for decades, in all kinds of theatres and combat zones. Whether for backyard plinking, hunting afield, target shooting at the local range, home protection or deployed in battle, AAC is the undisputed industry leader in innovation, and the silent authority on the science of sound reduction.

WHAT'S IN A NAME?
IN THIS CASE, EVERY
MAJOR ADVANCEMENT
IN SILENCERS
SINCE 1998.

BECAUSE GUNS CAN BE AS LOUD AND OBNOXIOUS AS OUR COMPETITORS' UNFOUNDED CLAIMS.

THE BENEFITS OF USING A SILENCER

Since hearing damage accumulates over the course of a lifetime, successful measures to prevent hearing loss are best implemented at a young age. For those wishing to prevent any further hearing loss, there's no better time to start avoiding unnecessary damage than right now. For those reasons and more — extending far beyond the realm of scientific sound reduction — silencers aren't just a luxury, they're fast-becoming a necessity. To help you understand some of the wide-reaching benefits of silencer use, we've developed the simple acronym, S.H.A.R.P.

S.H.A.R.P.

PROTECTION HAS A PURPOSE, AND A PLAN.

SAFETY

By improving your ability, as well as the ability of all those around you, to hear important range commands, warnings and ambient noises, silencers dramatically improve the overall safety environment on the range and in the field. With traditional hearing protection such as earmuffs, these important sounds could otherwise be muffled.

HEARING PROTECTION

With a silencer, you remove the hearing protection from your ears and put it directly on your gun. This equals increased comfort and situational awareness for you, and it benefits all others around you, too. Historically, hunters in the field have opted not to use hearing protection, and generations of hunters have suffered the devastating effects of hearing loss as a result. However, a silencer-equipped modern hunting firearm means you no longer have to choose between hearing your game, and protecting your hearing.

ACCURACY

By reducing turbulence as the bullet exits the barrel and reducing sound and recoil-spawned user flinch in the process, silencers work to help tighten your shot groups. For new or younger shooters, using a silencer means being able to focus on marksmanship fundamentals and enjoy the overall shooting experience with considerably more comfort.

RECOIL REDUCTION

The drastic reduction of expanding gases plus the added-on weight of the silencer help to mitigate felt recoil. For new shooters, less kick means more shooting enjoyment, and the ability to better focus on establishing marksmanship fundamentals. Our Cyclops 50 BMG-rated silencer is so effective that even shooters with extreme sensitivity to recoil can comfortably fire big bore guns that would otherwise be overwhelming to shoot.

PRESERVATION OF NIGHT VISION

Whether used when hunting hogs at night, helping to protecting hearth and home, or by our soldiers stationed in harm's way, a silencer preserves essential night vision by reducing muzzle flash.

THEN AND NOW

WE DIDN'T INVENT IT. WE JUST PERFECTED IT.

Silencer. Suppressor. Moderator. Can. Whatever you call it, shooting a firearm with one attached creates a more enjoyable, accurate and overall effective shooting experience. Silencers have been available in the U.S. for over 100 years — since 1909 when Hiram P. Maxim brought the first commercially successful silencer to the market. Essentially, Maxim's invention worked the same as a muffler on a car. Hot and often still burning gas flies out of the gun muzzle and rapidly expands in the air at supersonic speed, creating a BANG when a shot is fired.

Maxim realized that if he could trap that gas in a confined space and allow it to cool as it expanded through a series of baffles, the sound of the rapidly heated air could be reduced. Maxim's invention was extraordinarily popular and could be bought at local hardware stores, or mail-ordered and conveniently shipped to your doorstep for \$3.25.

Today, the process for silencer ownership isn't quite as fast or easy, but consumers nationwide are realizing the benefits of shooting suppressed, and the majority of states in the U.S. allow ownership, as well as hunting, with a silencer.

PERCEPTION VS. REALITY

While the common perception of silencers has largely been shaped by Hollywood depictions of shadowy underworld characters, this is far from the reality. With an estimated 1 million registered silencers in the U.S., silencers have gained wide acceptance as a highly effective, mainstream shooting tool, and modern firearms enthusiasts are experiencing their myriad benefits. Fact is, once you shoot suppressed, you'll never want to shoot any other way.

SILENCERS ARE LEGAL IN 42 STATES.

ULTRA INNOVATIVE. VIRTUALLY INDESTRUCTABLE.
AND COMPLETELY LEGAL.

* This information comes from the American Suppressor Association and is no substitute for your own legal review.

Reside in one of the 42 states that currently allow civilian ownership of silencers: you shoot suppressed, you'll never want to shoot any other way.

AL, AK, AZ, AR, CO, CT, FL, GA, IA, ID, IN, KS, KY, LA, ME, MD, MI, MS, MN, MO, MT, NE, NV, NH, NM, NC, ND, OH, OK, OR, PA, SC, SD, TN, TX, UT, VA, VT, WA, WV, WI, AND WY

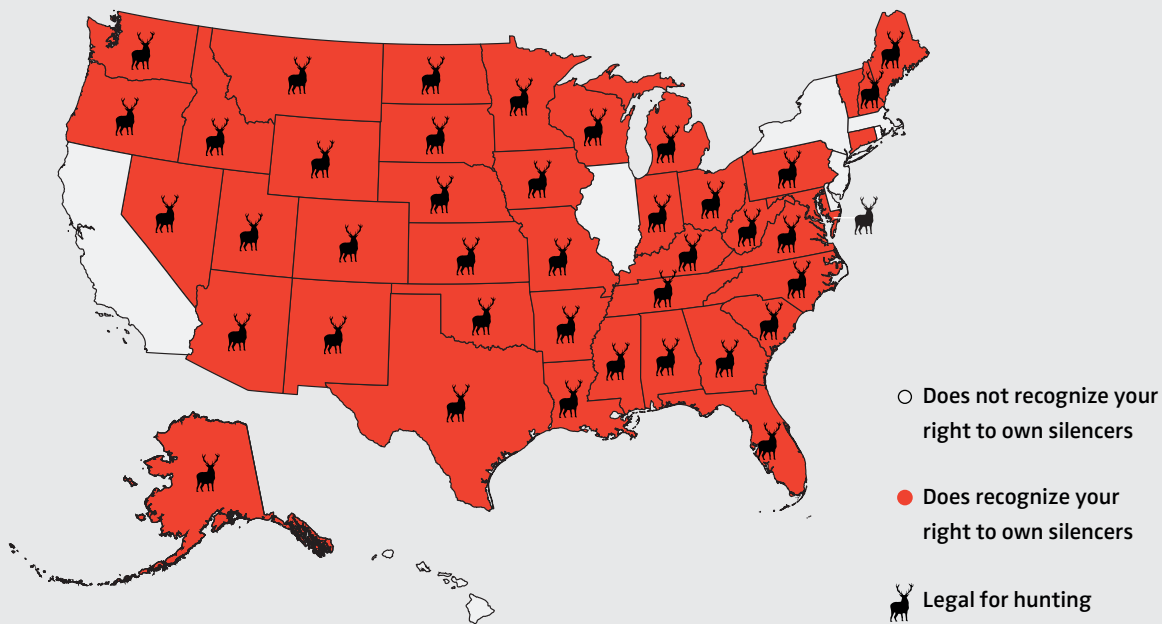

Silencers fall under the purview of the National Firearms Act (NFA) and are regulated by the NFA Branch of the Bureau of Alcohol, Tobacco, Firearms, and Explosives (BATFE). To purchase or legally possess a silencer, you must:

A – Be at least 21 years of age to purchase a silencer from a dealer.

B – Be a resident of the United States.

C – Be legally eligible to purchase a firearm.

D – Pay a one-time \$200 transfer tax.

SILENCERS ARE LEGAL TO HUNT WITH IN 40 STATES.

Individual state hunting laws will vary. The definition of legally hunted game differs greatly between states.

Consult your local game laws before using your AAC silencer in the field.

2017 NEW AAC PRODUCTS

TI-RANT 9M

Your choice of maximum sound reduction and maximum maneuverability in one brilliant 9mm package. Long and short of it, decibels disappear.

BLASTOUT

Works to minimize blast pressure and concussive forces, while maximizing MSR shooting enjoyment. Fast-attach for quick & easy one-handed operation.

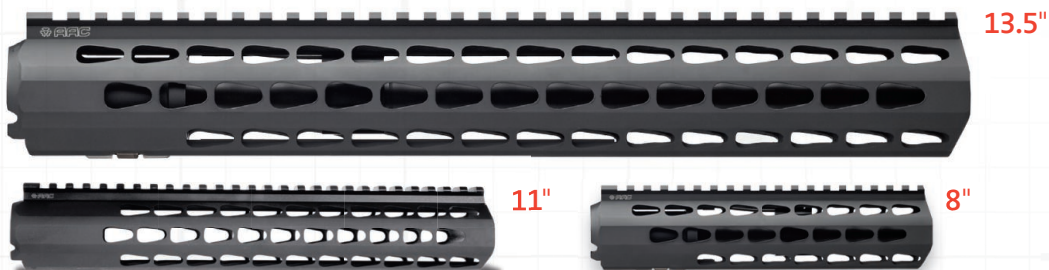

GLOCK 34 THREADED BARRELS

AAC silencer-ready barrels require no fitting to install. Simply drop-in and your Glock 34 is good to go — almost instantly.

SQUAREDROP HANDGUARD (w/ available 3-inch Accessory Rail) – See page 40 for more details.

Install and remove your rail system with innovative turnbuckle mounting design. Fast, easy and infinitely configurable.

CLEARLY,
THE INDUSTRY NEEDED
INNOVATING. AGAIN.

ICON LEGEND

90T RATCHET MOUNT

Based on feedback from consumers, AAC designers configured a new family of Blackout flash hiders and muzzle brakes with a 90 tooth gear and revised mounting geometry to provide a rock-solid interface between the silencer and host firearm, reducing point of impact shift and enhancing accuracy.

90T RATCHET TAPER MOUNT

The evolutionary fast-attach 90 Tooth Ratchet Taper mounting system provides a rock solid interface and minimizes point-of-impact shift, enabling users to fully explore the accuracy potential of their host weapon. For use with 5.56mm and 7.62mm hosts, users are able to securely install or remove the silencer in seconds using an intuitive motion and gross motor skills.

THREAD MOUNT

The tried and true standard for universal and reliable silencer installation. Direct thread mounts allow you to quickly and securely fit your silencer to a variety of host firearms.

51T RATCHET MOUNT

The 51T Ratchet Mount is one of the most intuitive, and extensively tested, silencer mounting systems available. Users are able to mount their silencer on a weapon securely in seconds without the use of tools. The very action of dismounting a 51T Ratchet Mount breaks the bonds of copper and carbon that often stick other silencer and flash hiders together.

TOOL INCLUDED

Many of our silencers are easily disassembled for cleaning and maintenance using the provided AAC silencer tools.

RIMFIRE SILENCERS

WE BELIEVE RIMFIRE SHOULD BE SEEN AND NOT HEARD.

Freedom-loving Americans fire hundreds of millions of rounds of 22 LR annually, and for good reason: it's affordable, accurate and comfortable to shoot. It's also the ideal cartridge to use with a silencer, as working pressures are low, and the suppressed sound signature is greatly diminished – allowing for normal conversations without shouting. Due to its cost-effective MSRP, many silencer owners begin suppressed shooting with a rimfire can. However, 22 LR isn't the only rimfire option available. Additional rimfire cartridges include: 22 Winchester Magnum, 17 HMR, and 17 MACH II. All AAC rimfire silencers are user-serviceable and minimally rated for 22 LR. Individual AAC rimfire silencer ratings will vary by model.

CHOOSE YOUR SILENCER

ELEMENT2

AVIATOR2

ELEMENT 2

LIGHTWEIGHT & DURABLE
WITH ABSOLUTELY NO
WEAKNESS WHATSOEVER.

The Element 2 is an ultra high-performance silencer designed for use on pistols and rifles chambered for 22 LR, 17HMR, 17 MACH II, and 22 Magnum. Its Titanium tube and durable stainless steel baffles weigh only 4.7 ounces. The Element 2 can be completely disassembled for cleaning and maintenance.

ABSOLUTE DISASSEMBLY

Engineered to be completely disassembled for cleaning and maintenance.

RIMFIRE PERFECTION

Designed for use on pistols and rifles chambered in 17 HMR, 17 MACH II, and 22 Magnum.

FLUSH FIT

The $\frac{1}{2}$ -28 tpi mount is a full-diameter, flush fit design, CNC machined from durable and lightweight Titanium.

CHOOSING YOUR AAC RIMFIRE SILENCER

5.7 AND FULL AUTO CAPABILITY FOR RIMFIRE CANS

Some people believe that owning a rimfire silencer rated for 5.7 and full auto fire is a must. In reality, however, most people don't own a full auto 22 LR or a 5.7 firearm – so why pay the premium? Fact is, the majority of 22 LR-rated silencers will be more than sufficient for the vast majority of owners. In other words, if you don't shoot 22 WM, 17 HMR, 17 MACH II, or 5.7, consider buying just what you need in a standard 22 LR-rated can, and use the money saved to purchase additional ammo. Our Aviator 2 is an excellent, durable entry-level option for most shooters who only shoot 22 LR. The Element 2 is rated for 22 LR, 22 WM, 17 HMR, and 17 MACH II specifically, and is built to last multiple lifetimes.

SUBSONIC 22 LR ACCURACY IN PISTOLS

Rimfire shooters who are looking for maximum sound signature reduction typically use subsonic ammunition. But while subsonic ammo for pistols may sound great, it can become unstable due to its reduced speed, causing "keyhole" (non-concentric circle) impacts on paper at certain distances – both without and with a silencer attached.

SUPERSONIC 22 LR IN PISTOLS

Many rimfire shooters don't realize it when shooting supersonic 22 LR ammo in pistols, but the bullet is traveling much slower than the box-stated velocities (typically measured from a rifle). This is due to the shorter pistol barrel, and the compressed length and time needed to leverage the powder charge. In fact, supersonic rimfire ammunition fired through pistols is usually moving at subsonic speeds. There are some 22 LR rounds that are "hypersonic" such as Remington Yellow Jackets and CCI Stingers that may still be supersonic, or transonic, out of pistol length barrels.

TAKEAWAY

So which rimfire silencer is the right one for you? If you want an entry level, high performance and high value 22 LR only silencer – the Aviator 2 is the clear choice. It's truly a silencer everyone can use to enhance their shooting experience, but without the extra features and expense of other models. If you want a proven, lightweight, yet exceptionally durable silencer for multiple calibers, the Element 2 does it all, and is an industry favorite for a reason.

ELEMENT2

MSRP : \$479

CALIBERS	WEIGHT	LENGTH	DIAMETER	MATERIALS	FINISH	ATTACHMENT	REDUCTION	SOUND PRESSURE LEVEL
22 LR, 22 MAG, 17 HMR, 17 MACH II	4.7 ounces	5.2" (4.7" added)	1.0"	17-4PH SS, Titanium	CeraKote™	1/2 - 28 Direct Thread	41dB*	115dB*

Say hello to the best-selling high-performance rimfire silencer on the market. Introduced in early 2012, the Element2 improves upon the original Element with an outer tube and flush fit rear mount of durable, lightweight Titanium. The stainless steel baffles and front end cap can be easily removed for cleaning and maintenance with the supplied end cap spanner and baffle removal tool. The Element2 is rated for use on 22 LR rifles and pistols and rifles chambering .17HMR, .17 M2, and .22 Magnum. Finally the Element 2 is full auto rated for use with 22 LR machine guns.

*Walther P-22, CCI Standard Velocity

AVIATOR2

MSRP : \$299.95

CALIBERS	WEIGHT	LENGTH	DIAMETER	MATERIALS	FINISH	ATTACHMENT	REDUCTION	SOUND PRESSURE LEVEL
22 LR	4.0 ounces	6.4" (6.0" added)	1.0"	6061-T6, 7075-T6, 304 SS	T3 Hardcoat Anodize, Nitride	1/2 - 28 Direct Thread	41dB*	115dB*

The AVIATOR 2 is a durable and light weight silencer for 22 LR pistols & rifles. The AVIATOR 2 features a durable one-piece anodized aluminum body with a stainless steel insert featuring industry standard 1/2-28 threads. The o-ring sealed, flush fit front end cap can be easily removed using the supplied spanner tool for routine cleaning and maintenance. The easily removable stack of K-baffles employed in the AVIATOR 2 is machined from stainless steel and hardcoat anodized 7075-T6 aluminum, and delivers minimal first round pop and a level of sound reduction typically found on silencers costing hundreds of dollars more.

*Walther P-22, CCI Standard Velocity

CENTERFIRE PISTOL SILENCERS

HEARING SAFE. SIGNIFICANTLY LESS FRIENDLY TO INTRUDERS.

While excessive muzzle report and muzzle blast are generally the main causes for new shooter flinch, centerfire pistol silencers greatly mitigate these undesired effects, allowing new shooters to focus on establishing their shooting fundamentals. For those who own a pistol for home protection, a pistol silencer protects your hearing while you protect your family. Whether plinking, target shooting, or for use in home defense, a pistol silencer is an intelligent addition to your arsenal, making shooting in all scenarios significantly safer and more comfortable. All current AAC pistol silencers are user-serviceable for long-term use and can be shot dry or wet.

Refer to product specs for individual caliber ratings and read the callouts in this catalog for more info on pistol silencer options.

CHOOSE YOUR SILENCER

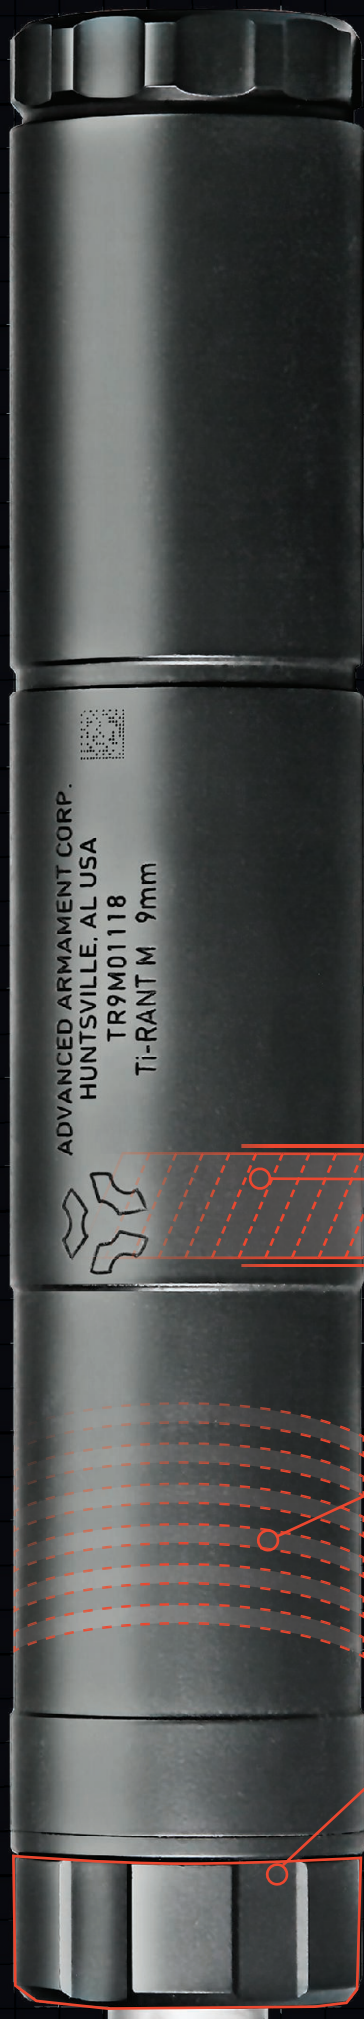

CONCENTRIC		ECCENTRIC
TI-RANT 9M	TI-RANT 45M	ILLUSION 9

TI-RANT 9M

HEARING SAFE.
SIGNIFICANTLY LESS
FRIENDLY TO INTRUDERS.

AAC's standard-setting 9mm pistol silencer is back; now in a modular format – the Ti-RANT 9M. The sweet sound users have loved for nearly a decade is now available in a user-configurable design. With no tools required, users are able to quickly and easily configure the patented design of the Ti-RANT 9M as either a full-sized 8-inch silencer when sound reduction is paramount, or a 5.8-inch compact model when the overall system length trumps discretion. One tax stamp. Two silencer configurations. The 9M replaces the legacy Ti-RANT 9 and Ti-RANT 9S.

MULTIPLE APPLICATIONS

Optimized for 9mm signature reduction on semi-automatic pistols, the 9M can also work on fixed barrel carbines and full-auto subguns. Also supports rimfire calibers due to its user-serviceable design.

LIGHT YET STRONG

Titanium main tube. 7075-T6 aluminum front module. 17-4 SS blast baffle. 7075-T6 aluminum baffle stack. Built for years of service.

EXTRA PISTON

9M includes a ½-28 and a metric 13.5-1LH piston in the box.

TOOL-FREE TAKEAPART

Easily disassemble by hand for routine cleaning and maintenance.

CHOOSING YOUR AAC PISTOL SILENCER

MODULARITY

AAC's Ti-RANT 45M and Ti-RANT 9M offer a revolutionary new feature you may not even realize you need – versatility. Longer silencers maximize sound suppression, but at the cost of length and added weight. Shorter silencers favor weight and length reduction, but at the cost of sound suppression. Until modular silencers were introduced you would have to pay a tax stamp for a long silencer and a separate tax stamp for a short silencer. Modular cans give you a choice — delivering the best of both worlds with only one tax stamp — and essentially zero trade-offs.

As the need arises, you can configure the silencer for either maximum sound suppression in a long configuration or maximum maneuverability and ease of storage in a short configuration. Similarly, on certain fixed barrel rifles (pistol caliber carbines, lower pressure lever guns, and MSRs that shoot subsonic cartridges like 300 BLK), a modular pistol silencer allows you to adjust the overall length, while adjusting the sound reduction desired. As an added plus, the patented design of AAC's modular silencers does not require any tools to configure between long and short configurations, and can be easily disassembled without tools for ease of maintenance.

ECCENTRIC OR CONCENTRIC

Most pistol silencers on the market are concentric, meaning that the bore axis is located in the center of the silencer's tubular body. Therefore, if you want to see a regular sight picture over the body of the silencer, you'll need to purchase aftermarket "tall" suppressor sights for your pistol. An eccentric silencer, like AAC's ILLUSION 9, has the bore axis off-center, and in other words, biased towards one edge of the silencer body. Eccentric designs are intended to allow the host firearm to keep the regular factory height sights and still provide an unobstructed view of the sights on target. Instead of moving sights "up" with a concentric silencer, you move the body of the eccentric silencer "down". With very few exceptions the ILLUSION 9 will provide an unobstructed sight picture on most host pistols. Additionally, the timing mechanism of the ILLUSION 9 is easily adjustable by one-hand, requires no tools, and locks solidly.

45 AUTO VS. 9MM LUGER FOR A FIRST PISTOL CAN

New pistol silencer owners, or those on a budget, are best served buying a 45 Auto rated pistol silencer. Even if you're only shooting 9mm now, beginning with a 45 Auto silencer maximizes your tax stamp investment. The extra volume of a 45 Auto silencer will typically compensate quite well for the larger bore size versus the 9mm. In fact, many 9mm shooters really like the sound of 9mm through a 45 Auto rated can. All AAC 45 Auto rated silencers can be shot with 9mm, and deliver exceptional sound reduction. If you know for certain that you're only going to shoot 9mm, or your budget is more flexible, a dedicated 9mm silencer may be a good choice. Otherwise, a 45 Auto silencer will probably be your best bet.

K-BAFFLES AND SHIELDED CONE BAFFLES

The Ti-RANT 45M and 9M series of concentric pistol silencers deliver exceptional performance, in large part due to their K-baffles. The K-baffle design continues to be used by AAC in our Ti-RANT line because it offers class-leading sound reduction, generates a very pleasant tone, and less back pressure (which improves sound at the shooter's ear and reduces the amount of gas and particulate matter blown into the shooter's face) than other baffle designs. Because the current K-baffle design is not a shielded design, proper maintenance at the recommended interval is important to ensure the baffle stack can be removed from the body without excessive effort. The ILLUSION 9 eccentric pistol silencer is our first pistol silencer to utilize a shielded cone baffle – which creates a “tube within a tube” to separate fouling from the inside of the silencer body. Shielded cone baffles provide users with the advantage of keeping the tube cleaner, and facilitating easier baffle removal.

SUBSONIC VS. SUPERSONIC 9MM

For the ultimate in discreet shooting, it is necessary to use subsonic ammunition with your silenced 9mm host. Some ammunition manufacturers are now marketing ammunition specifically for suppressed use that is designed to be subsonic. Most 147 grain 9mm ammo is generally of the subsonic variety, but check the manufacturer's specs to be certain. This doesn't mean you can't shoot 115 or 124 grain supersonic 9mm through your silencer, but you will get the supersonic crack that makes your shot sound louder, and you'll get more gas and particulate matter in the face.

LEADED OR UNLEADED?

Silencer cleaning can be an arduous task. The use of fully jacketed or fully plated projectiles without any lead exposed ultimately helps to reduce the amount of cleaning your pistol silencer requires. Ammunition with a fully enclosed base can be referred to as FNEB (flat nose enclosed base), TMJ (total metal jacket), leadless, or similar. The reduction in exposed lead means the baffles, piston, and other internals components will develop less build-up over the same period of time as they would shooting “leaded” ammunition.

TI-RANT 9M

MSRP : \$799.99

CALIBERS	WEIGHT	LENGTH	DIAMETER	MATERIALS	FINISH	ATTACHMENT	REDUCTION	SOUND PRESSURE LEVEL
9mm Luger, 22 LR	9.3 ounces 7.7 ounces	8" (7.6" added) 5.8" (5.4" added)	1.4"	Grade 9 Ti, 17-4 PH SS, 7075-T6	CeraKote™	Various Via Direct Thread Piston	32dB* 21dB**	124dB* 134dB**

AAC's standard-setting 9mm pistol silencer is back; now in a modular format – the Ti-RANT 9M (Modular). The sweet sound users have loved for nearly a decade is now available in a user-configurable design. With no tools required, users are able to quickly and easily configure the patented design of the Ti-RANT 9M as either a full-sized 8-inch silencer when sound reduction is paramount, or a 5.8-inch compact model when the overall system length trumps discretion. The modular design of the Ti-RANT 9M encapsulates the three front-most advanced 7075-T6 baffles in an easily removable auxiliary baffle module that incorporates a patented design feature that prevents the module from inadvertently unscrewing from the main tube during use. One tax stamp. Two silencer configurations. The 9M replaces the legacy Ti-RANT 9 and Ti-RANT 9S.

*Full-size configuration – Smith and Wesson M&P 9mm, Rem L9MM9 **Compact configuration - Smith and Wesson M&P 9mm, Rem L9MM9

TI-RANT 45M

MSRP : \$849.99

CALIBERS	WEIGHT	LENGTH	DIAMETER	MATERIALS	FINISH	ATTACHMENT	REDUCTION	SOUND PRESSURE LEVEL
22 LR, 38/357, 9mm Luger, 300 BLK Subsonic, . 40 Auto, 44 Magnum, 45 Auto	12.3 ounces 10.6 ounces	9" (8.6" added) 6.9" (6.5" added)	1.4"	Grade 9 Ti, 17-4 PH SS, 7075-T6	CeraKote™	Various Via Direct Thread Piston	31dB* 21dB**	141dB* 131dB**

The best selling silencer for 45 Auto, 40 Auto, and 9mm Luger hosts was made more versatile in 2015. The Ti-RANT 45M (Modular) includes all the high quality features users have come to expect from AAC, with a twist. Without the use of tools, users can, in seconds, reconfigure the Ti-RANT 45M from a full sized 9-inch silencer into a 6.75-inch compact model. The modular design of the Ti-RANT 45M encapsulates the three front-most advanced 7075-T6 baffles in an easily removable auxiliary baffle module that incorporates a patented design feature that prevents the module from inadvertently unscrewing from the main tube during use. The entire baffle stack of the Ti-RANT 45M can be easily removed for cleaning and maintenance. Despite being optimized for use on 45 Auto hosts, the Ti-RANT 45M provides excellent sound reduction on 9mm, 40 Auto hosts, and 44 Magnum rifles. Additionally, a 5/8 x 24 adapter is available for 2017 that enables users to employ their Ti-RANT 45M on semi-automatic rifles, carbines, and pistols chambered in 300 BLK for the purpose of firing subsonic ammunition.

*Full-size configuration - H&K USP Tactical 45, Rem 230gr Ball **Compact configuration - H&K USP Tactical 45, Rem 230gr Ball

ILLUSION 9

MSRP : \$799.99

CALIBERS	WEIGHT	LENGTH	DIAMETER	MATERIALS	FINISH	ATTACHMENT	REDUCTION	SOUND PRESSURE LEVEL
9mm Luger, 22 LR	9.6 ounces	7.9" (4.7" added)	1.25"	7075-T6 17-4 PH SS	CeraKote™	Various Via Direct Thread Piston	32dB*	127dB*

Think beyond the box. The ILLUSION 9 is a compact, high performance silencer for modern 9mm semi-automatic pistols. Like the Maxim model 1910 silencer, the ILLUSION 9 features an offset, non-centralized bullet path. Unlike the Maxims of old, the advanced design of the ILLUSION incorporates a highly evolved, patent pending A.S.A.P. (Assured Semi Automatic Performance) system that ensures reliable operation on a broad spectrum of self loading host pistols and enables users to quickly and easily adjust the rotational orientation of the silencer to provide an unobstructed sight picture on most hosts featuring standard-height sights. The tabbed, captured cone baffle stack of the ILLUSION 9 can be easily removed from the tube for cleaning and maintenance without the use of specialized tools, and features a heat treated, 17-4 stainless steel blast baffle with a durable nitride finish. Users can quickly and easily configure the ILLUSION 9 with adapter pistons for barrels with 1/2-28 and M13.5 x 1 LH threads.

*Smith and Wesson M&P 9mm, Rem 147gr L9MM9

THREADED PISTOL BARRELS

MSRP : \$253.99

AAC is proud to offer a line of silencer ready barrels for popular pistols chambered in 9mm and 45 Auto. Precision CNC machined from 416R stainless steel with a black Isonite QPQ finish, all AAC silencer ready barrels feature cut broach rifling for compatibility with jacketed and lead ammunition. AAC silencer ready barrels are designed to drop in and function with no fitting required, and feature chamber dimensions that will accept all commercial, SAAMI specification ammunition. All initial offerings will be available with unified threads (1/2 x 28 for 9mm, .578 x 28 for 45 Auto) and left hand metric muzzle thread profiles (M13.5 x 1 LH for 9mm, M16 x 1 LH for 45 Auto) where applicable. Each AAC silencer ready barrel comes standard with a knurled thread protector cap.

HARD USE RIFLE SILENCERS

AS ADAPTABLE AND EFFICIENT AS THE OPERATORS WHO TRUST THEIR LIVES TO THEM.

Substantially higher temperatures and higher pressures generated by a hard use rifle mean this type of silencer must be as well-built and durable as it is effective at reducing sound. For unobstructed ease of use, they're designed to minimize weight, point of impact shift, and overall length. Additionally, they're built to minimize back pressure, ensuring proper semiautomatic function while reducing gas-in-the-face of the shooter. Lastly, a reliable mechanism to quickly attach and detach a silencer to the firearm is required.

Modern silencers combine the use of exotic super alloys to bring durability and weight reduction, advanced baffle designs to maximize sound suppression and reduce back-pressure, and a reliable fast-attach muzzle device to secure the silencer to the firearm. AAC's hard-use rifle silencers and mounting designs have a lineage of materials and technology proven on the frontlines of battle for nearly two decades.

SR-5

The SR-5 is an evolutionary fast-attach mounting system silencer for 5.56mm hosts. Using a variant of the 90 Tooth Ratchet Taper fast-attach system, users are able to securely install or remove the SR-5 in seconds using an intuitive motion and gross motor skills. The rock solid interface of the 90 Tooth Ratchet Taper fast-attach system minimizes point-of-impact shift and enables users to fully explore the accuracy potential of their host weapon. Exclusive to the SR series of silencers, our innovative 90 Tooth Ratchet Taper fast-attach system provides users with the ultimate balance of ease of use and effectiveness, delivering ultra-reliable lock-up with superb alignment. The durable, fully-welded, Inconel 718 baffle core of the SR-5 is designed to minimize back pressure and features a newly designed blast baffle that provides additional erosion resistance for use with short barreled hosts.

The image shows a black SR-5 silencer against a dark grid background. Three callout lines with circular endpoints point to specific features: 1. A top callout points to a circular area of concentric dotted lines on the upper body. 2. A middle callout points to a horizontal band on the lower body, which is outlined with dashed lines. 3. A bottom callout points to the fast-attach mechanism at the very bottom of the device. The text "← ON-OFF →" is visible on the upper body of the silencer.

SUPERALLOY STRENGTH

Fully-welded, 718 Inconel baffle core minimizes back pressure and heat degradation.

FULLY FORTIFIED

Re-designed rear blast baffle features 2x the impact-absorbing thickness and strength.

SECURE IN SECONDS

Fast-attach 90 Tooth Ratchet Taper allows secure installation and removal in 3 seconds.

SR-5

MSRP : \$849.00

MINI4

MSRP : \$895.00

CALIBERS	WEIGHT	LENGTH	DIAMETER	MATERIALS	FINISH	ATTACHMENT	REDUCTION	SOUND PRESSURE LEVEL
5.56mm NATO	13.5 ounces	5.3" (3.5" added)	1.5"	Inconel® 718, 316L SS	CeraKote™	51T Ratchet Mount	22dB**	143dB*

The Mini4 (5.56) is an ultra-compact silencer for CQC rifles and carbines. Don't let the size fool you; the Mini4 is packed with hard-use technology. It has a fully welded Inconel® 718 baffle core and features the 51T Ratchet Mount. Although it is designed to present a compact profile, the Mini4 significantly reduces the sound and flash signatures of its intended host firearms. For best results, use with barrels longer than 14.5".

*14.5" Colt M4 / 10.5" MK18, M855

556-SD

MSRP : \$649.99

CALIBERS	WEIGHT	LENGTH	DIAMETER	MATERIALS	FINISH	ATTACHMENT	REDUCTION	SOUND PRESSURE LEVEL
5.56mm NATO	18.0 ounces	6.7" (5.0" added)	1.5"	Inconel® 718, 316L SS	CeraKote™	51T Ratchet Mount	31dB*	134dB*

The 556-SD is a fast attach silencer for 5.56mm hosts. With a design based on an earlier version of the best selling M4-2000, the compact and light weight 556-SD offers consumers feature-rich content and excellent value. The 556-SD uses the tried and true 51T Ratchet Mount fast attach system that enables users to install or remove the silencer in seconds. The baffle core of the 556-SD features 100% Inconel 718 and full circumferential fusion welding to provide a lifetime of use under the most demanding conditions.

PRECISION RIFLE SILENCERS

LET YOUR BULLET PLACEMENT DO THE TALKING.

Precision rifles, whether bolt-action or semi-auto, are the pinnacle of firearm accuracy. A properly engineered silencer will have no adverse effect on rifles shot group, and will shrink group sizes more often than not. Similarly, the point of impact shift between suppressed and unsuppressed shooting should be as small as possible, but must be consistent and repeatable to be of any benefit.

AAC's precision rifle silencers are designed to complement the rifle's accuracy, minimize point of impact shift, all while providing the best possible sound reduction. Weight is a big factor on point of impact shift so our silencers are ultra-lightweight, while still being durable enough to support the caliber of choice. The 300-TM & MK13-SD are optimized for 300 Winchester Magnum, while our TITAN series is designed specifically for 338 Lapua Magnum. Like our hard use rifle silencers, our precision rifle silencers have been tried and tested in the crucible of battlefield combat, and proven themselves worthy and reliable.

CHOOSE YOUR SILENCER

300-TM	TITAN-TI
MK13-SD	TITAN-QD

TITAN-QD

The TITAN-QD is a lightweight, fast-attach silencer that's engineered for bolt action precision rifles, and chambered for the hard-hitting long range 338 Lapua Magnum and 300 Winchester Magnum cartridges. The all-Titanium, fully-welded TITAN-QD features AAC's 90T Ratchet Mount fast-attach system and a patented Hyposone baffle module for the utmost sound reduction and accuracy. The TITAN-QD is in service with U.S. and Coalition forces around the globe, and is currently being delivered as part of the package to the U.S. Army on the Remington XM2010 & PSR2 precision rifles.

ULTRA LIGHT

All-Titanium construction results in a lightweight silencer with hard-hitting magnum strength.

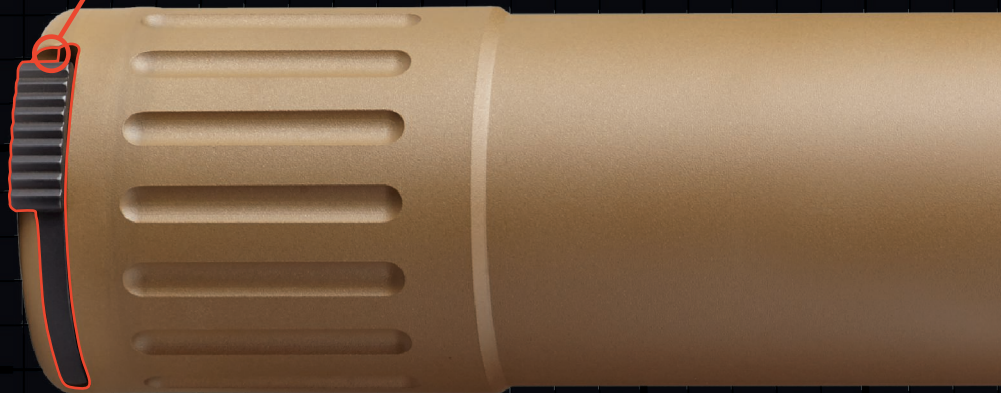

SERVICE PRECISION

The TITAN-QD is the most prolific 338 Lapua and 300 Winchester Magnum rated silencer in service with U.S. military personnel.

SECURE IN SECONDS

Fast-attach 90 Tooth Ratchet mount enables secure installation and removal in seconds.

300-TM

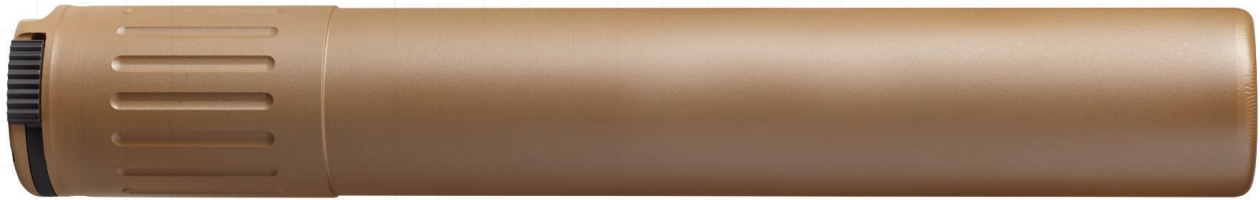

MSRP : \$1,195

CALIBERS	WEIGHT	LENGTH	DIAMETER	MATERIALS	FINISH	ATTACHMENT	REDUCTION	SOUND PRESSURE LEVEL
300WM/7.62mm NATO	15.6 ounces	9.3" (8.7" added)	1.5"	Grade 5 & 9 Ti	CeraKote™	Various Via Direct Thread	28-33dB*	137-142dB*

The 300-TM is the direct-thread sibling of the military tested and adopted Mk13-SD. Designed for use on bolt action 300 Winchester Magnum and 7.62mm NATO rifles, the 300-TM combines the simplicity of direct-thread mounting with an ultra-lightweight, high strength, Titanium body that is tuned to deliver class-leading accuracy and minimal point of impact shift. The 300-TM provides precision rifle users with an unparalleled value.

*20" Remington 700 300WM, Remington 180gr., PSP R300W2

MK13-SD

MSRP : \$1,499

CALIBERS	WEIGHT	LENGTH	DIAMETER	MATERIALS	FINISH	ATTACHMENT	REDUCTION	SOUND PRESSURE LEVEL

SPECIALITY RIFLE AND MACHINE GUN SILENCERS

LESS SOUND. MORE FURY.

Some silencers, like some guns, simply don't fit into categories very well. That's the case with our CYCLOPS and MG-SD silencers. The Cyclops is designed to tame the behemoth blast of the 50 BMG cartridge, while the MG-SD is purpose-built and military-approved for 5.56 and 7.62 belt-fed machine guns

CHOOSE YOUR SILENCER

MG - SD	CYCLOPS
---------	---------

CYCLOPS

The CYCLOPS is a fast-attach silencer for bolt-action and single shot rifles chambering the 50 BMG cartridge. The revolutionary design significantly reduces blast overpressure and environmental disturbance while reducing the sound signature at the shooter/spotter's ear to well below the risk limit for sustaining permanent hearing loss. The CYCLOPS is constructed of specially heat-treated, high-strength alloys, and is hand welded to withstand the intense pressures of the 50 BMG cartridge. The CYCLOPS couples to a proprietary, high-efficiency muzzle brake that features a scaled-up version of the AAC Ratchet Latch fast-attach system.

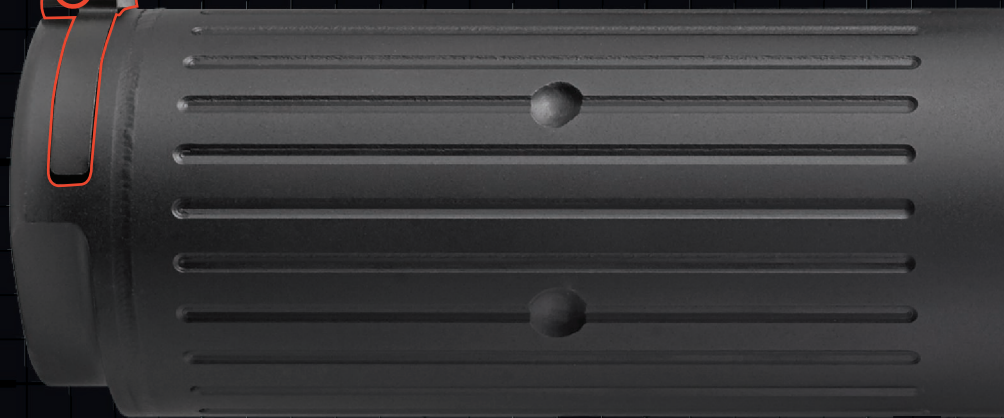

HEAT TREATED

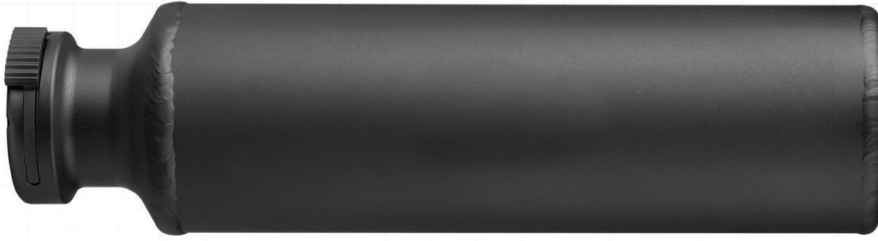

The CYCLOPS is constructed of specially heat treated, high strength alloys and is hand welded to yield a structure that can withstand the intense pressures of the 50BMG cartridge.

FAST ATTATCH

The CYCLOPS couples to a proprietary high-efficiency muzzle brake that features a scaled-up version of the AAC 80-tooth Ratchet Latch fast-attach system.

MG-SD

MSRP: \$2,295 

CALIBERS	WEIGHT	LENGTH	DIAMETER	MATERIALS	FINISH	ATTACHMENT	REDUCTION	SOUND PRESSURE LEVEL
5.56mm NATO, 7.62mm NATO	31 ounces	7.6" (5.9" added)	2"	316 L SS, Inconel® 625 & 718	CeraKote™	90T Taper Mount	25dB** 26dB*	138dB

The military-chosen MG-SD is a single unit solution for reducing the sound and flash signature of 7.62 and 5.56 light machine guns. Designed from the ground-up to handle the unrelenting heat and abrasive blasting from sustained firing, the MG-SD features a rugged monolithic core of heat treated Inconel 718. The core is fully circumferentially welded to the Inconel outer tube and 316 stainless steel "fast-attach" mount. The MG-SD couples to a Blackout flash hider using the new rock-solid, evolutionary, 90 tooth Ratchet Taper Mount. Reducing the sound, flash, and dust signature of belt-fed light machine guns saves lives in combat and preserves the hearing of the shooter and nearby support personnel. NSN: 1005-01-599-7029.

*FN M249, M855 | **FN M240B, M80

CYCLOPS

MSRP: \$2,595 

CALIBERS	WEIGHT	LENGTH	DIAMETER	MATERIALS	FINISH	ATTACHMENT	REDUCTION	SOUND PRESSURE LEVEL
50 BMG	4 lbs., 15 ounces	15.8" (14.3" added)	2.5"	4130 Steel	CeraKote™	90T Ratchet Fast-Attach	32dB*	137dB*

The CYCLOPS is a "fast-attach" silencer for bolt action and single shot rifles chambering the 50 BMG cartridge. The revolutionary design of the CYCLOPS significantly reduces blast overpressure and environmental disturbance while reducing the sound signature at the shooter/spotters ear to well below the risk limit for sustaining permanent hearing loss. The CYCLOPS is constructed of specially heat-treated, high-strength alloys and is hand welded to withstand the intense pressures of the 50 BMG cartridge. The CYCLOPS couples to a proprietary high-efficiency muzzle brake that features a scaled-up version of the AAC Ratchet Latch fast-attach system.

NEW AAC ACCESSORIES

INSPIRED INNOVATION. IMPROVED PERFORMANCE.

Silenced guns are already cool; but silenced guns can always use a little extra comfort, flexibility, and style. AAC introduces the new SquareDrop Handguard and 3 Inch Accessory Rail to accessorize your favorite MSR.

3 INCH ACCESSORY RAIL

ORDER NUMBER	DESCRIPTION	LENGTH	OUTER DIAMETER	INNER DIAMETER	WEIGHT	UPC	MSRP
64267	SquareDrop Accessory 3 Inch Picatinny Rail (includes wrench)	3.08"	0.83"	0.37"	0.9 ounces	847128010951	\$23.00

AAC's 3 Inch Picatinny accessory rail is made of Type 3 hard coat anodized 6061-T6 aluminum and features stainless steel mounting hardware. A snag resistant design and 5 equipment mounting slots are the perfect complement to AAC's SquareDrop Handguard or any KeyMod hand guard. The full featured dual recoil lugs of the 3 Inch Picatinny accessory rail ensure long-term durability and solid lock-up. The 3 Inch Picatinny accessory rail comes with mounting hardware pre-assembled to simplify attachment.

Includes install wrench (not shown).

AAC SQUAREDROP HANDGUARD ASSEMBLIES

ORDER NUMBER	DESCRIPTION	LENGTH	OUTER DIAMETER	INNER DIAMETER	WEIGHT	UPC	MSRP
64272	SQUAREDROP HANDGUARD 8" w/ WRENCH	8.0"	1.75"	1.30"	6.35 ounces	847128010982	\$179.99

- Extended alignment flanges ensure a repeatable fit eliminating torque or rotational force movement
- Innovative turnbuckle mounting design allows users to quickly and easily install and remove handguard
- The unique SquareDrop attachment technology allows mounting of both existing Keymod and future SquareDrop accessories
- Full length internal ribs for superior strength and durability
- Smooth snag free design – no more “cheese grater” effect!
- Infinitely adjustable mounting positions for any accessory – create your own mission specific configuration
- 100% free-float system for optimal accuracy

PROPRIETARY TURNBUCKLE
Extremely easy assembly and disassembly

UPPER RECEIVER OVERLAP
Creates fast repeatable upper rail alignment

KEYMOD COMPATIBLE
Works with mounting of both Keymod and future SquareDrop accessories

MUZZLE DEVICES

JUST THE TIP OF THE ICEBERG.

AAC offers a comprehensive line of muzzle devices, from non-silencer mount flash hidere to 51T and 90T silencer mounting Blackout flash hidere and muzzle brakes, to the Brakeout compensators to non-silencer mounting flash hidere.

51T BLACKOUT FLASH HIDER

Consistently rated as the best flash hider on the market today, the Blackout is available in a wide variety of thread pitches to fit most of today's commercial and military rifles. Available in 5.56 and 7.62 hosts.

18T BLACKOUT ACCESSORY MOUNTING FLASH HIDER

Features silencer mounting architecture that enables users to quickly and easily install or remove an AAC M4-1000 or older model M4-2000 or 762-SD silencer using an intuitive motion and gross motor skills. AAC 18T muzzle brakes are available for rifles chambered in 5.56mm and 7.62mm. For use with 18T mount silencers, made 2010 and prior.

90T BLACKOUT ACCESSORY MOUNTING FLASH HIDER

For the past decade, the military chosen and adopted BLACKOUT flash hider has been considered one of the most effective small-arms flash hidere in the world. The three-prong design all but eliminates visible flash on barrels as short as 10 inches. 90 tooth ratchet-taper BLACKOUT flash hidere for the SR series silencers are available for 5.56 and 7.62 hosts.

NON-SILENCER MOUNT FLASH HIDER

Don't need to mount a fast attach silencer but still want the world's best flash reduction? AAC has you covered.

NEW MUZZLE DEVICES

BLACKOUT NON-SILENCER MOUNTING 7.62MM AK FLASH HIDER

Three-prong flash hider for the Kalashnikov platform. 7.62 caliber. Metric 14 x 1 Left Hand threads. Proven flash reduction capability of AAC's BLACKOUT flash hider now for the AK.

BLACKOUT NON-SILENCER MOUNTING 9MM FLASH HIDER

Three-prong flash hider for growing 9mm market of subguns, SBR's, and carbines. The BLACKOUT design offers superior flash suppression to current birdcage/closed-end muzzle devices. Available with 1/2-36 and 1/2-28 threads.

BLACKOUT FAST-ATTACH 3-LUG 9MM FLASH HIDER

Spring loaded fast-attach BLACKOUT flash hider for H&K MP-5 style 3-lug barrels.

NEW
AAC BLASTOUT

The AAC BlastOut is a muzzle accessory designed to improve the modern sporting rifle user experience by significantly reducing blast pressure and perceived concussive forces. The design directs the muzzle blast forward of the shooter, sparing range neighbors and training partners from uncomfortable, distracting, lateral blast pressure. The proven industry-standard AAC Fast Attach mounting system allows for facilitates quick and easy one-handed installation or removal. The steel body is designed for hard-use and long-term durability, and features a wear-resistant nitride finish. The BlastOut weighs 6 ounces and adds less than 1/16-inch in length to the host firearm. Available for 51T and 90T Ratchet-Taper muzzle devices.

51T AND 90T RATCHET-TAPER BLACKOUT ACCESSORY MOUNTING MUZZLE BRAKE

The BLACKOUT muzzle brake provides excellent recoil mitigation and enables users to quickly and easily install an AAC fast-attach silencer or other accessory to their rifle or carbine. Available in 51T and 90T Ratchet-Taper configurations for 5.56 and 7.62 hosts.

CYCLOPS
SILENCER MOUNTING
MUZZLE BRAKE

AAC CYCLOPS 80T silencer-mounting muzzle brakes are designed to dampen recoil and minimize muzzle rise while firing the hard hitting 50 BMG cartridge. Architecture on the CYCLOPS muzzle brakes facilitates quick and easy installation and removal of an AAC CYCLOPS silencer. The CYCLOPS muzzle brake features a dual chamber design that is carefully tuned to provide optimum recoil management and enhanced accuracy.

51T AND 90T RATCHET-TAPER BRAKEOUT 2.0 ACCESSORY MOUNTING COMPENSATOR

The new symmetrical design of the BRAKEOUT 2.0 does not need to be timed with shims like a conventional muzzle brake, and offers the best flash and recoil reduction in a truly compromise-free design. Available in 51T and 90T Ratchet-Taper configurations for 5.56 and 7.62 hosts.

TITAN-QD
AND Mk13-SD
SILENCER MOUNTING
MUZZLE BRAKE

AAC 90T ratchet-mount muzzle brakes feature mounting architecture that enables users to quickly and easily install or remove an AAC TiTAN-QD or Mk13-SD using an intuitive motion and gross motor skills. AAC 90T ratchet-mount muzzle brakes are available for precision rifles chambered in 7.62, 300 WM, and 338 LM.

NEW ADAPTERS/ ACCESSORIES

NEW FIXED BARREL SPACER

The new and improved design of the patent-applied-for fixed-barrel spacer replaces the silencer driving spring and allows EVO-9, ILLUSION 9, and Ti-RANT 9/45 users to employ their silencers on fixed-barrel hosts.

NEW TiRANT45 5/8-24 ADAPTER

You asked for it, and AAC delivers. This patent-applied-for adapter enables owners of 45 caliber Ti-RANT series silencers to install their silencer on 300 BLK rifles and carbines for the purpose of shooting subsonic 300 BLK ammunition. The 5/8-24 adapter is installed in place of standard piston & drive spring.

FIXED BARREL SPACERS

AAC's A.S.A.P. system takes the weight of the silencer off the barrel, allowing it to move and the host pistol to function in a normal semi-automatic fashion. On weapons with non-moving barrels the A.S.A.P. system is not necessary and may actually damage the host firearm. This fixed barrel spacer replaces the driving spring in the A.S.A.P. system and allows users to safely use their silencer on host firearms with non-moving barrels.

.22 PISTOL ADAPTERS

These adapters allow you to attach any silencer with 1/2-28 TPI to the Walther P22 pistol or a 1/2-28 TPI to the Sig Mosquito pistol with factory-threaded barrel.

EVOLUTION TI-RANT AND ILLUSION ASAP ADAPTER PISTONS

All Evolution/ Ti-Rant/ILLUSION Series Pistons feature heat treated stainless steel construction, a matte bead blasted finish, and engraving to identify the thread diameter, pitch, and direction of rotation for installation (Left Hand threads or Right Hand threads).

THREAD PROTECTORS

Prevent damaged muzzle threads when your silencer is not installed with a knurled, black finished, steel thread protector from AAC.

SHIM KITS

Shim Kit includes 6 different shims of varying thicknesses for the purpose of properly timing a flash hider or muzzle brake.

ROCKSET

A semi-permanent thread locking compound that will withstand temperatures up to 2,000 degrees. Small applicator bottle holds enough for a few mounts, but is NOT meant for long term storage.

ELEMENT AND PILOT 2 BAFFLE REMOVAL TOOL

Baffle Removal Tool allows users to safely disassemble a dirty silencer and doubles the factory recommended 500 round cleaning interval. The Baffle Removal Tool features alloy steel construction with a corrosion resistant finish and is supplied with a piloted brass pusher tip to minimize contact wear on the baffles.

TRIAD (EVOLUTION & TI-RANT) 3-LUG ADAPTERS

The TRIAD Series are adapters that enable users to install an EVO 9/ECO 9 or TI-RANT Series silencer onto an H&K MP-5 3-lug barrel or a barrel that has been adapted using a 3-lugged extension made to the same specifications as an H&K factory barrel.

SILENCER END CAP SPANNER TOOL

This AAC OEM End Cap Disassembly Tool makes taking down any Element 2 or Pilot 2 silencer for cleaning and maintenance a simple and easy task, and is great for use as a spare for the range bag or for replacing the factory-supplied tool if it gets misplaced.

BLACKOUT FLASH HIDER INSTALLATION/REMOVAL TOOL

The BLACKOUT Flash Hider Installation/Removal Tool enables armorers to quickly and easily install and remove a three-prong BLACKOUT flash hider using a 3/8-inch socket wrench.

MOLLE POUCH

Protect your hearing with the silencer. Protect your silencer with the pouch.

APPLICATION CHART

The following application chart provides a basic overview of our silencer models, the calibers they're compatible with, plus technical specs and features to help you determine which silencer is the right one for you.

AAC PISTOL SILENCER MODELS		CALIBERS	WEIGHT	LENGTH	DIAMETER
TI-RANT 9M		9mm Luger, 22 LR	9.3 ounces / 7.7 ounces	8" (7.6" added) 5.8" (5.4" added)	1.4"

CYCLOPS		50 BMG	4 lbs., 15 ounces	15.8" (14.3" added)	2.5"

LEGAL TERMS

SPECIFICATIONS

AAC is committed to delivering the most up-to-date, state-of-the-art products, and maintains a rigorous R&D program. Due to this, prices and specifications are subject to change without notice.

LIFETIME LIMITED WARRANTY

AAC will repair, or replace free of charge, any silencer manufactured by AAC for the duration of this lifetime warranty. This warranty is of unlimited duration, and covers, at Advanced Armament Corp. and its affiliates' discretion, service, repair, and/or replacement of damaged products caused by normal use.

This warranty does not cover damage to the silencer and/or host firearm resulting in whole or in part from criminal, abusive or negligent use, improper or careless handling, unauthorized modifications, defective, improper hand-loaded or reloaded ammunition, or neglect. Any repairs to the unit made necessary by these factors will be invoiced to the owner. Further, baffle strikes which are not due to a defect in workmanship are not covered by this warranty. 5.56mm caliber silencers are not warranted for use on barrels less than 10" in length.

Negligent or abusive use is defined as utilizing the silencer in a way that is likely to result in premature wear or damage to either the silencer or the host firearm. Further, the warranty does not cover prohibited usage as described in our various owners manuals.

This expressed limited lifetime warranty is the only warranty on this product. This product is sold "as is" and has no implied warranties, merchantability, or fitness for a particular purpose. There are no warranties which exceed beyond the description put forth hereto. If your silencers are not covered under this warranty, you may have the silencer replaced for half the most current retail price and subject to any and all transfer fees required by the BATFE.

APPENDIX

SOUND MEASUREMENT

Unless otherwise specified, all the silencer performance data in this catalog was collected with a Brüel & Kjær digital pulse system using the widely employed industry standard microphone placement of 1 meter to the left of the muzzle at a height of 1.6 meters.

What this means is, that when we tell you how well our silencers work, we've got the numbers to back it up. We're not padding the test data in our favor, we go by the military's rigid and exact testing methods and procedures.

WHY WE CHOOSE TO PUBLISH PERFORMANCE DATA

We publish sound reduction numbers as a service to our customer base, especially the first-time buyer. When you run across a manufacturer that offers a "general" estimation of performance or posts no performance data at all, you have to ask yourself what they're hiding. AAC® silencers are in service with the U.S. military after undergoing rigorous evaluation at such esteemed testing facilities as the Naval Surface Warfare Center (Crane Division), Aberdeen Proving Ground, and Picatinny Arsenal. Anyone seeking verification need look no further than open discussion forums such as silencertalk.com, as well as the articles published in *Guns & Weapons for Law Enforcement* and *Special Weapons for Military and Police* by world-renowned silencer authority Al Paulson. Copies of many of these articles are available for download in PDF format at www.advanced-armament.com.
