AR-10A Super S.A.S.S.

ArmaLite is pleased to offer the AR-10A Super SASS. ArmaLite customers asked for a choice, and that's just what we've provided: the AR-10A SASS accepts 3rd party polymer magazines. This SASS is functionally identical to our traditional AR-10B SASS which takes only ArmaLite's proprietary steel magazines. Operation, controls, and maintenance are the same. However, the new AR-10A SASS does NOT accept the traditional ArmaLite AR-10 B's steel mags.

Caliber: .308/7.62 X 51 mm NATO Length: 41.1" (Collapsed) 42.1" (Extended) Weight: 11.8 lbs Rifling Twist: RH 1:10" Barrel: 20" Triple Lapped, Ceramic Coated Stainless Steel Match Included with Rifle: One 20 round magazine, swivel mount, Owner's Manual, Limited Lifetime Warranty

Part Number: A10SCBF

Part Number: A10002023F

AR-10A Super S.A.S.S. Carbine

ArmaLite is pleased to introduce the AR-10A Super SASS as a carbine. Like its rifle-length brother, the AR-10A SASS Carbine accepts 3rd party polymer magazines. It is a lighter weight, versatile and supremely accurate firearm perfect in LE and military support roles. Used in its suppressed mode, the SASS Carbine can help facilitate communication between team members.

The SASS Carbine's lighter weight and suppressed mode capability also make it an excellent choice in the brush as a hog hunter.

Caliber: .308/7.62 X 51 mm NATO Length: 35.7" (Collapsed) 39" (Extended) Weight: 9.1 lbs Rifling Twist: RH 1:10" Barrel: 16" Triple Lapped, Ceramic Coated Stainless Steel Match Included with Rifle: One 20 round magazine, Owner's Manual, Limited Lifetime Warranty

Part Number: A10TBNF

Part Number: AU10TBF

AR-10A Target Rifle

None of our competitors can surpass the superb accuracy and reliability of the ArmaLite AR10(T). No other manufacturer dedicates itself to the advancement of target autoloading rifle technology like we do.

From enhanced reliability of feeding, extraction and ejection to assuring consistency of cyclic rate, ArmaLite's engineering team continues the company tradition of ground-breaking innovations in the AR design.

The 10TBNF is available in a model that takes ArmaLite proprietary magazines and in a California legal model.

Caliber: .308/7.62 X 51 mm NATO Length: 39.6" Weight: 10.3 lbs Rifling Twist: RH 1:10" Barrel: 20" Triple Lapped, Stainless Steel Match Included with Rifle: One 10 round magazine, Owner's Manual, Limited Lifetime Warranty

Part Number: A10A4CBA2F

Part Number: AU10A4CBA2F

AR-10A Tactical Carbine

ArmaLite is proud to announce its AR-10A Tactical Carbine. ArmaLite has long been known for its Tactical carbines chambered in .223/5.56X45mm NATO. They are based on the traditional A2 front sight, A2 upper receiver and permanent carry handle.

The AR-10 Carbine combines an innovative A2 style front sight with the A4 flat-top upper receiver so popular for its ability to accommodate sights, scopes, lights and other accessories.

The new A2 style front sight was designed by ArmaLite's engineers and is manufactured from forgings here in our factory. The front sight is taller than traditional A2 front sights to account for differences in AR-15 and AR-10 receiver heights. This eliminates any issues of being able to zero your sights when a carry handle or flip up rear sight is used in combination with an A2 style front sight, on your .308 platform.

Caliber: .308/7.62 X 51 mm NATO **Length:** 35.3" (Collapsed) 39.3" (Extended) **Weight:** 9 lbs **Rifling Twist:** RH 1:11.25" **Barrel:** 16" Double Lapped, Chrome Lined/Chrome Moly **Included with Rifle:** One 20 round magazine, Owner's Manual, Limited Lifetime Warranty

Part Number: A10A4CBFX

Part Number: AU10A4CBFX

AR-10A Low Profile Carbine

You're looking at the ArmaLite A10A4CBFX. This carbine takes the AR-10A a step further with free-float quadrail handguards specially fitted to a low profile gas block. This allows maximum hand placement choice and accessory locations when a longer handguard is placed on a shorter gas system upper half. The result is a hardworking, flexible firearm with astounding accuracy.

This AR-10A Carbine accepts third party polymer magazines. It is functionally identical to our traditional AR-10B carbine which takes only ArmaLite's proprietary steel magazines. However, the AR-10A Carbine accepts polymer mags, not ArmaLite's traditional AR-10 B's steel mags.

Caliber: .308/7.62 X 51 mm NATO Length: 37.7" (Collapsed) 39" (Extended) Weight: 8.8 lbs Rifling Twist: RH 1:11.25" Barrel: 16" Double Lapped, Chrome Lined/Chrome Moly Included with Rifle: One 20 round magazine, Owner's Manual, Limited Lifetime Warranty

Part Number: A10A4CBF

Part Number: AU10A4CBF

AR-10A Carbine

ArmaLite proudly offers the AR-10A Carbine. You asked for a choice and ArmaLite now provides it: this option of the famous AR-10 will accept third party polymer magazines.

The AR-10A carbine is functionally identical to our traditional AR-10B which takes only ArmaLite's proprietary steel magazines. Operation, controls, and maintenance are the same.

The AR-10A carbine is perfectly suited to both military and law enforcement duty. It is a gas operated, magazine fed, semiautomatic produced to provide a level of accuracy, dependability, and durability that is not found in other rifles of similar design. This firearm provides a perfect platform for all sighting options with its forged flattop receiver with Mil Spec Picatinny rail.

You can purchase extra polymer mags for the AR-10A Carbine from our website, www.armalite.com

Caliber: .308/7.62 X 51 mm NATO Length: 35" (Collapsed) 38.25" (Extended) Weight: 7.9 lbs Rifling Twist: RH 1:11.25" Barrel: 16" Double Lapped, Chrome Lined/Chrome Moly Included with Rifle: One 20 round magazine, Owner's Manual, Limited Lifetime Warranty

Part Number: U15TB

M-15TBN

The M-15TBN is your universal rifle offering versatility for a number of applications. This firearm features a triple lapped, stainless steel 18" match grade barrel, an ArmaLite National Match trigger set, and free floated quad rail handguards. Every specification of this rifle is intended for outstanding accuracy and precision for that first shot and every **other** shot. The M-15TBN sets the ArmaLite Standard of Excellence.

Caliber: .223/5.56 X 45 mm NATO Length: 32.2" (Collapsed) 38.5" (Extended) Weight: 7.9 lbs Rifling Twist: RH 1:8" Barrel: 18" Triple Lapped, Stainless Steel Match Included with Rifle: One 10 round magazine, Owner's Manual, Limited Lifetime Warranty

Part Number: 15A4TBN

Part Number: U15A4TB

M-15(T)TM Target Rifle

The M-15 (T)TM delivers pinpoint accuracy on demand. It's great for competition and the range. But its light weight and sleek, no-slag configuration also make the M-15 (T) perfect for varmint hunting. When you head into the woods or brush you're carrying a triple lapped, stainless steel 20" match grade barrel, an Armalite National Match trigger set, and a free floated stainless steel match grade barrel. Every specification of this rifle is intended for outstanding accuracy and precision for that first shot and every OTHER shot. The M-15(T) sets the Armalite Standard of Excellence. It's THE rifle you want in your hands on your next hunt.

Caliber: .223/5.56 X 45 mm NATO Length: 38.4" Weight: 8.8 lbs Rifling Twist: RH 1:8" Barrel: 20" Triple Lapped, Stainless Steel Match Included with Rifle: One 10 round magazine, Owner's Manual, Limited Lifetime Warranty

Part Number: 15SPR1CB

Part Number: 15003082

M-15A4 SPR MOD 1

ArmaLite® is known for its history of innovation. Its Special Purpose Rifle (SPR®) has proved it for years. The ArmaLite SPR Mod 1™ proves it once more, in spectacular fashion. The SPR Mod 1 is a forged, one-piece upper receiver/rail system with exclusive detachable side and bottom rails. That means you can change your 1913 rails to fit your changing needs for sights... lights... lasers... grips... or swivels.

The SPR Mod 1's one-piece construction offers you a continuous optics platform (COP). There's no gap to bridge between receiver and upper rail when installing your scope or sights. This one-piece construction's strength and rigidity will also keep your sights zeroed in the most trying conditions.

Caliber: .223/5.56 X 45 mm NATO **Length:** 32.7" (Collapsed) 36" (Extended) **Weight:** 6.8 lbs **Rifling Twist:** RH 1:7" **Barrel:** 16" Double Lapped, Chrome Lined/Chrome Moly **Included with Rifle:** One 30 round magazine, Flip up front and rear sights, Owner's Manual, Limited Lifetime Warranty

Part Number: 15A4CB

Part Number: U15A4CB

M-15A4 Carbine™

The most versatile M-15 Rifle Model available. When the rifle application calls for compact over-all length without sacrificing close quarters accuracy and platform flexibility for sight selections, the ArmaLite M-15A4 SPR Carbine is the Special Purpose Rifle model to fulfill the requirements. The ArmaLite designed mid-length handguard and gas tube technology provides an optimal gas pulse to power the 16" system so reliability is never an issue.

Also available in AWB (Assault Weapon Ban) and California-legal configurations.

Caliber: .223/5.56 X 45 mm NATO Length: 32.5" (Collapsed) 35.8" (Extended) Weight: 6.5 lbs Rifling Twist: RH 1:7" Barrel: 16" Double Lapped, Chrome Lined/Chrome Moly Included with Rifle: One 30 round magazine, Owner's Manual, Limited Lifetime Warranty

AR-30A1 .300 Win Mag and .338 Lapua

The AR-30A1 is part of the new generation of ArmaLite's highly acclaimed bolt action rifles: the ULTIMATE long range target and tactical firearm. The AR-30A1 is available in a target version and a standard version. Both versions are available in .338 Lapua and .300 Win Mag.

On the surface, the AR-30A1 bears a family resemblance to its predecessor, the AR-30. But, every individual component of the AR-30 was scrutinized in the AR-30A1. As a result, only the pistol grip, buttpad, trigger, and a few small components from the AR-30 passed muster for the AR-30A1. All other components are new and/or improved. The result is a firearm that maintains its predecessor's outstanding accuracy, light weight, and soft recoil while dramatically improving its ergonomics, adaptability, versatility, reliability and ease of use.

Caliber: .300 Win Mag/.338 Lapua **Length:** 46.1"/48.1" (Collapsed) 48.1"/50.1 (Extended) **Weight:** 14.5 lbs/15.3 lbs
Rifling Twist: RH 1:10"/RH 1:10" **Barrel:** 24" Chrome Moly/ 26" Chrome Moly **Included with Rifle:** One 5 round magazine, Detachable Sight and Accessory Rail, Owner's Manual, Limited Lifetime Warranty

AR-31™ .308 Winchester

ArmaLite Inc. proudly introduces the new AR-31. The AR-31 shares the design and the accuracy of our highly acclaimed AR-30A1 bolt-action rifles, but with three MAJOR differences: the AR-31 is chambered in .308 Winchester, it is a short action version of the AR-30A1, and it accepts ArmaLite's AR-10B double-stack magazines. That means you can use 5, 10, 15, 20 and 25 round mags with the AR-31. For sub-MOA accuracy, think ArmaLite's AR31!

ester

Caliber: .308 Winchester Length: 45.4" (Collapsed) 47.4" (Extended) Weight: 14 lbs Rifling Twist: RH 1:10"
Barrel: 24" Double Lapped, Chrome Moly Included with Rifle: One 10 round magazine, Detachable Sight Rail and Accessory
Rails, Owner's Manual, Limited Lifetime Warranty

Part Number: 50A1B
Part Number: 50A1B-416

AR-50 BMG & .416 Barrett

The heart of the AR-50A1™ is its metallic stock to action interface. The patented V-block stock and bedding wedge assure absolute strength and repeatability for superb accuracy. The aluminum stock reinforces the receiver almost like a bench-rest sleeve.

Accuracy? It's not just in the bedding. Independent testing has proven the AR-50A1 muzzle brake to be the best in the industry for both recoil control and accuracy. It scrapes away turbulent muzzle gasses and lets the bullet break into clean air for amazing accuracy.

Strength, accuracy, and stability make the AR-50A1 stunningly durable and accurate for decades of hard use. You'll be proud to hand it down to the next generation.

ArmaLite's new AR-50A1-416 Barrett is just like the AR-50A1, but chambered for the .416 Barrett cartridge. This rifle boasts the same patented V-Lock™ Bedding Wedge that assures superb accuracy.

Caliber: .50 BMG/.416 Barrett Length: 58.5" Weight: 34.1 lbs Rifling Twist: RH 1:15"/ RH 1:12" Barrel: 30" Chrome Moly Included with Rifle: One 15 Minute Sight Base, Owner's Manual, Ear Plugs, Limited Lifetime Warranty

Part Number: 50A1BNM

AR-50 BMG National Match

What do you do with the best high-powered competition and tactical rifle in the world? At ArmaLite, you make it even better.

ArmaLite's AR-50A1 National Match is similar to our standard AR-50A1 with some VERY important differences. The AR-50A1 NM is produced from selected components: the National Match's 33 inch barrel is three inches longer than the standard AR-50A1's barrel. The barrel has eight flutes. The flutes help with cooling and reduce unnecessary weight while maintaining accuracy-enhancing stiffness. The barrel has a rock solid 50 BMG chamber. The result is sub MOA accuracy.

Caliber: .50 BMG **Length:** 61.5" **Weight:** 33.6" **Rifling Twist:** RH 1:15" **Barrel:** 33" Chrome Moly Fluted, 8 Groove
Included with Rifle: One 15 Minute Sight Base, Owner's Manual, Ear Plugs, Limited Lifetime Warranty, ArmaLite Skid System

ArmaLite One Piece Scope Mounts

ArmaLite's 1 piece scope mounts come in 4 different configurations, 1" and 30 mm in both high and medium heights.

AR-10/M-15 Rear Sight Assemblies

A reliable back-up rear sight that mounts on AR-10/M-15 models featuring a Mil-Std 1913 rail. It features the same windage and elevation controls as ArmaLite carry handles. When using this rear sight, substantial room is left on the upper receiver to mount a reflex sight system (ACOG, Red Dot, etc.).

AR-10/M-15 Detachable Carry Handles & Front Sights

Detachable carry handles and detachable front sights are available for both AR-10's and M-15's. We also have an ArmaLite engineered A2 front sight manufactured specifically for our AR-10 A4 flat-top receivers. Visit www.armalite.com for more details.

AR-10/M-15 1913 ALOSTYR Quad Rail Handguards

No special fitting required! This fully machined aluminum handguard system comes in short, mid-length and rifle lengths. Each kit includes four Picatinny rails to replace your current handguards without requiring the removal of the Delta Ring. Three rail covers are also included. These ArmaLite rails work on both .223 and .308 rifles.

AR-10/M-15 Barrel Assemblies

ArmaLite offers the complete barrel assemblies for all of its rifles. To see a complete listing of barrel assemblies check out our website.

AR-10/M-15 Magazines

ArmaLite offers multiple options for all your magazine needs. We have a variety of sizes and calibers available on our website.

AWC Suppressors

World Class Suppressor Technology

AWC has provided suppressed weapon systems to the U.S. Army, U.S. Navy, U.S. Air Force, U.S. Marine Corps as well as to thousands of hunting and firearm enthusiasts. We have supplied suppressed weapons systems to major Law Enforcement Agencies, Wildlife Agencies and such diverse groups as the U.S. Department of Interior, the Department of Energy, Federal and State correctional facilities, the R.C.M.P., and Special Forces units throughout Europe, Central America, Asia and the Middle East.

It would be safe to say, that over 30 years of supplying suppressors to a remarkably broad spectrum of shooters, we have literally seen it all. At AWC Systems Technology, we pioneered much of the most important development work in both symmetric and asymmetric baffling, initial blast containment, wipeless end baffles, gas-jet redirection channeling, heat displacement pathing, advanced material utilization, captured barrel harmonics and on and on. We have probably destroyed more suppressors during our "Fire-to Failure" testing than many of today's suppressor manufacturers have had a chance to make in total.

AWC is, as it always was, one of America's oldest and most respected purveyors of suppressors and tactical weaponry. We take great pride in what our work has meant to the sportsmen and professionals who use our products day and night. We listen to what our customers need and make sure it becomes a reality. Our work in development has never stopped and for good reason: our developmental success is what may have brought you here. It also is why a majority of suppressor shoppers stay and become AWC clients for life. They may be called "cans" but believe us when we tell you a well made suppressor is anything other than simple to design or easy to make. The fact of the matter is that far too few individuals truly understand the inner workings of a suppressor. When it comes to AWC, the more you understand the better we look and sound. We will be here and we are working hard to make sure you will be too.

ArmaLite Factory-Authorized Armorer Courses

ArmaLite offers two factory-authorized armorer's courses. One is for active duty military, LE, government, security, and corporate armorers and operators only. The other course is for civilian ArmaLite enthusiasts. Both classes will familiarize students with the two-stage trigger group of the ArmaLite .223/.308 system. The military/LE course will also include the full-auto trigger group. Students will disassemble rifles to their smallest components and receiver groups and then reassemble them. The military/LE course will also teach students how to resolve firearms problems without having to send rifles for factory servicing. ArmaLite rifles and tools can be provided at no extra charge for all courses at the Phoenix, Arizona location only. If you are a certified or current armorer, these courses will re-certify you for three years. A certificate of completion for department records is also provided. If you or your agency is interested in attending or hosting a course please contact Jerod Johnson at jerod@statraininggroup.com.

"A History of Innovation"
